

Albany Oregon Real Estate Market Report

Mid-Year 2026 — Prices, Trends, and What Buyers and Sellers Need to Know

MARKET SNAPSHOT — MID-2026

Metric	Value
Median Sale Price	\$420,000
Average Days on Market	18–22 days
Year-Over-Year Appreciation	4.2%
Months of Inventory	2.1 months
Mortgage Rate Range (30-yr fixed)	5.4%–6.1%
Active Listings (typical)	180–220 homes

WHAT'S DRIVING ALBANY'S MARKET

Albany's 2026 market reflects a steady, demand-driven environment rather than the volatility of 2021–2022. Three factors are sustaining buyer activity:

- 1. Affordability relative to Oregon peers.** Albany's \$420,000 median is \$80,000–\$120,000 below Corvallis and \$230,000+ below Portland. Remote workers, OSU-affiliated buyers, and relocators from California and Seattle continue to find Albany's price-to-quality ratio compelling.
- 2. Limited inventory.** With 2.1 months of supply, Albany remains a seller-favoring market. A balanced market is typically 4–6 months. Correctly priced homes are being absorbed quickly — the shortage is most acute in the \$350,000–\$500,000 range.
- 3. Corvallis commute demand.** Albany's 10–15 mile proximity to Oregon State University and Corvallis's healthcare and technology employers creates a consistent buyer pool of professional households who want Albany's affordability without Corvallis's prices.

PRICE PERFORMANCE BY NEIGHBORHOOD

Neighborhood	Median Price	YOY Change	Avg Days on Market
North Albany	\$510,000	+5.1%	12–16 days
Historic Downtown	\$395,000	+3.8%	22–28 days
Knox Butte	\$455,000	+4.3%	20–26 days
South Albany / Periwinkle	\$330,000	+3.5%	24–32 days
Oak Creek	\$470,000	+4.7%	18–24 days

FOR BUYERS IN 2026

Interest rate context: At 5.4%–6.1%, a \$400,000 loan carries a principal and interest payment of approximately \$2,271–\$2,399 per month. Buyers who purchased in 2020–2021 at sub-3% rates are largely staying put, which is reducing resale inventory and supporting prices.

Buying power tip: Each 0.5% rate decrease adds approximately \$30,000–\$35,000 in buying power at the same monthly payment. Buyers who purchase now and refinance when rates decrease capture both current inventory availability and future payment reduction.

Best value opportunities: South Albany and Periwinkle for entry-level buyers; Knox Butte for move-up buyers who want newer construction without North Albany's premium.

FOR SELLERS IN 2026

Optimal conditions: Spring (March–May) and early summer (June–July) generate the strongest buyer pools. The \$350,000–\$500,000 range is most competitive, with multiple offers common for well-priced, well-presented listings.

Pricing discipline matters: Homes priced accurately sell in 18–22 days at 98–102% of list price. Homes priced 5%+ above market average 45–65 days and typically sell for less than a correctly priced home would have.

Net proceeds reminder: Seller-side closing costs typically run 7–9% of sale price when commission is included. On a \$440,000 sale, plan for approximately \$33,000–\$40,000 in total transaction costs.

12-MONTH OUTLOOK

Albany's fundamentals — constrained inventory, consistent demand from the Corvallis corridor, and sustained affordability advantage over Oregon's larger markets — support continued moderate appreciation in the 3–5% range through 2027. A meaningful rate decrease (below 5%) would likely accelerate both buyer activity and price appreciation, particularly in North Albany and Knox Butte where buyer demand is most compressed by current rate sensitivity.
